

Special Issue

Public Projects, Public–Private Partnerships and Economic Sustainability Evaluation

Message from the Guest Editors

The current context, strongly characterized by the COVID-19 pandemic and by financial, economic and environmental emergencies, has further highlighted long-standing fragility: in particular, attention is focused on the need to relaunch the public role of institutions as a driving force and guarantee and guide in urban and territorial transformation processes. The scientific community has highlighted the need for these challenges to be considered by decision makers in the field of real estate appraisal and project economic evaluation. More specifically, the question of interest is what the premises and the perspectives are for new approaches and evaluation methods. A real rethinking of approaches is necessary in light of the current situation, especially considering the urgent need for new tools that support investment planning and capital budgeting, specifically planning, evaluating, and controlling investments, which capture the complexity of contemporary interventions along their life cycle, and that support the subjects involved in decision-making processes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
