

Topical Collection

Ensuring Quality Education and Good Learning Environments for Students

Message from the Collection Editors

Quality education is necessary in all areas of knowledge and at all educational levels. The quality of our educational systems and whether our educational institutions offer quality education or not are some of the main reasons why quality education is a topic that, in recent years, has attracted much attention.

This Topical Collection aims to provide people with the competencies to adapt to a changing and competitive world. The questions are, how to prevent school absenteeism, how to deal with early school leaving, how to prevent or alleviate the phenomenon of dropping out in higher education, etc. In other words, can we assume that student failure is partly due to the failure of our educational systems? Are we educating self-regulated, critical, learning-motivated, competent students?

These and other questions lead us to work in search of measures to improve the quality of our educational systems by proposing strategies and developing tools. Likewise, new technologies—as tools to support learning—and methodologies based on artificial intelligence are increasingly used to achieve quality in higher education.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
