

## Special Issue

# Advanced Studies in Sustainable Real Estate Markets and Urban Planning

### Message from the Guest Editor

After a long period of crisis, the real estate market has gone through a lot of changes, which the COVID-19 pandemic has emphasized. This Special Issue aims to discuss new developments for today's real estate markets and urban property developments. After the pandemic, some segments of real estate are expected to change more than others, such as logistic, innovative commercial and hospitality, and senior housing. In addition, traditional functions such as housing and commercial properties should be considered by examining and analyzing sustainable urban development, land planning, local communities, social and environmental criteria, population aging, social trading, real estate markets, sustainable investments, sustainable finance, price setting, smart cities, urban green policies, energy efficiency, and green housing, among others.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
