Special Issue

Regional Ecology and Sustainability

Message from the Guest Editors

Regional ecology, an important subject in ecology subject systems, originates from the regional comprehensive scientific survey and investigations of regional environmental pollution. The primary objectives of regional ecology are to study the background of regional environmental issues, their driving forces, and seek solutions to the existing environmental issues. Considering that different regions have their own unique characteristics and face different ecological problems and development paths, and although the application of some new theories and methods has greatly promoted the development of regional ecology, there still remains a number of important issues on regional sustainability, ecosystem services, and regional ecological security to be studied and resolved. Therefore, this Special Issue of Sustainability welcomes contributions from researchers on the general theme of regional ecology and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
