

Special Issue

Could RegTech and FinTech Play a Role in Supporting Green Finance and Promoting Sustainable Banking

Message from the Guest Editor

Combining both existing and new technologies, RegTech has the potential to play a crucial part in combating the regulatory challenges currently facing green finance and sustainable banking. As regulators continue to take the lead in the development of green finance and encourage market developments through adopting globally unified standards and benchmarks. With the increasing demand for green finance and sustainable banking, impactful legal, regulatory and policy-related academic research on the role of FinTech and RegTech can be a catalyst for change. The need in the existing literature for both empirical and theoretical perspectives remains very high. It is against this backdrop that this Special Issue aims to encourage, stimulate, advance and broaden theoretical and empirical research on the role of FinTech and Regtech on green finance and sustainable banking, thereby filling an important gap in the existing literature.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
