

## Special Issue

# Toward Sustainability: Reliable Transportation Network Design and Analysis

### Message from the Guest Editors

Transportation networks consist of a wide variety of critical infrastructure elements that help provide interconnectivity for complex social, economic and political systems. From air transport hubs, to key rail corridors and interstate highways, maintaining operational continuity and ensuring system resilience and sustainability is essential for the day-to-day functioning of society. The purpose of this Special Issue is to provide a collection of original research papers that consider these challenges. Of particular interest are contributions that detail innovative assessment and analysis methods (e.g., spatial analytics, location modeling, spatial optimization, game theory, data envelopment analysis, machine learning, artificial intelligence, geocomputation, simulation etc.) for developing reliable network designs, evaluating network survivability and vulnerability, and improving resilience, robustness, continuity, recovery, and restoration.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
