

Special Issue

Advances in Sustainable Development and Renewable Energy: Economic, Policy and Environmental Impact

Message from the Guest Editors

The topics covered in this Special Issue may cover broadly understood issues related to energy, in particular renewable energy and its impact on the natural environment, as well as on the quality of life. Articles presenting the impact of climate policy and renewable energy on energy prices and CO2 emission allowances, as well as on energy security, will be interesting. We are also eager to find out if renewable energy from solar and wind power plants (onshore and offshore) is able to ensure the continuity of the energy supply in various weather conditions, or should some solid fuel power plants be kept? In December 2012, the directive on energy efficiency entered into force in the European Union. This is another interesting approach that shows that energy demand should not be met only by increasing energy production but also by efficient energy use.

The issues presented above are only a proposal, and other topics related to sustainable development and energy will be welcome. Authors also are not limited to any specific country or region.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
