

Special Issue

Sustainable Civil Engineering: Reliability and Resilience of Infrastructures

Message from the Guest Editor

The Special Issue calls for papers on scientific, technical, and policy advancements related to civil infrastructure. This Special Issue aims to cover recent approaches, both in research and practice, of reliability and resilience considerations integrated in the formulation of sustainability models. The Special Issue invites contributions including but not limited to the following detailed topics: integrated stochastic models, sustainable bridges; resilient and reliable networks, and integrated community resilience. Authors of papers on these topics are encouraged to focus on a scope incorporating scientific advancement as well as practice-ready concepts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
