# **Special Issue**

# Development of Resilient Urban Food Systems— Exploring Synergies and Making Priorities

### Message from the Guest Editors

Applying an urban food systems approach, this Special Issue offers a holistic perspective on food and nutrition security by broadening the focus to food security, social and environmental outcomes and the socio-economic and environmental drivers of these food system activities. Importantly, an urban food system approach is showing how food systems interact with other (ecological, economic or political) systems, providing excellent opportunities for analysing how each element within a system interacts with the others in producing food system outcomes. The connectiveness of food system elements is depicted in a conceptual food system model. A food system approach covers knowledge about value-chain dynamics, factors influencing population movement, governance and market related activities, and environmental and climate conditions, which can all contribute to increased understanding about how to shape future food systems.

### **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
