Special Issue

Resources Policy and Sustainable Development

Message from the Guest Editor

Humankind, to satisfy its needs, creates products and services (technosphere) for which it takes resources from the natural environment (ecosphere). This process does not happen at "zero cost" but determines the release of pollutants in the atmospheric compartment, in surface water and groundwater, in the soil and subsoil, produces waste and requires large quantities of energy with the production of inevitable environmental impacts.

Therefore, experts from academia and industry, designers, architects, engineers, scientists, economists, sociologists, ecologists, communicators, educators and others are invited to share their theoretical and applied knowledge on the relationships between resources policy and sustainable development. In this sense, collaboration across disciplines is encouraged. This Special Issue will document contributions from all over the world in order to provide a scientific and practical improvement for the understanding of a problem of such great interest and global relevance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
