

## Special Issue

# Sustainable Reuse of Historical Buildings

### Message from the Guest Editor

The issue of underused or vacant historical buildings in contemporary cities is a massive phenomenon. To foster the sustainable valorisation of abandoned buildings and unused spaces in cities, the concepts of circular economy and adaptive reuse are crucial. To adopt circular economy within the built environment means to consider mainly three aspects: preserving the natural capital, maximising resource yields and designing the management of buildings and facilities' obsolescence. Adaptive reuse is based upon the assumption that buildings, areas, districts, and sites are not static entities. Adaptive reuse is an approach that can be considered sustainable. This is because it consists of the practice of introducing new content in an existing site, paying particular attention to the needs of society, and following the principle of maximum conservation and minimum transformation. This Special Issue aims to encourage works in both theoretical and applied fields dealing with different issues of sustainable reuse of historical buildings in the framework of circular economy and adaptive reuse concepts.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
