Risk Management Trends in Project-Based Organizations

Message from the Guest Editor

This Special Issue on “Risk Management Trends in Project-Based Organisations” aims to explore and bring out recent developments, new methods, tools and/or application examples (case studies) regarding risk management (including business continuity and crisis management) in the main project-based industries, for instance engineering, construction or information technology, without excluding other project-based industries. The connection of such developments with the sustainability of organisations in any or all aspects of the triple bottom line should be emphasised and will constitute the distinguishing factor of this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
