## **Special Issue**

# Risk and Security Management for Critical Infrastructures

## Message from the Guest Editor

This Special Issue will cover novel methodologies, concepts, and tools to support and strengthen the risk and security management for Cis, thus creating sustainable and resilient Cls. Therefore, it will focus on how existing standards and frameworks can be applied to the complex field of critical infrastructures and how a holistic view on critical infrastructures, e.g., on the physical and the cyber domain, can be achieved in risk and security management. Further, the Special Issue will also deal with innovative approaches tackling the aspect of interdependency and the influences among critical infrastructures. Facing today's complex threat landscape, no comprehensive security or risk management in the context of critical infrastructures can go without considering this perspective to reach a high degree of sustainability and resilience for the critical infrastructures. Additionally, real-life use cases as well as examples from the practice together with empirical studies covering the application of approaches toward more sustainable and resilient critical infrastructures will also be welcome in this Special Issue.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
