# **Special Issue**

# Road Safety as a Pillar of Sustainable Transportation

## Message from the Guest Editors

Sustainability and safety are two closely interrelated concepts that both concern the conservation of resources. While sustainability is typically associated with environmental resources, safety is about human resources and the safeguarding of human life. The basic principle is that a transportation system cannot be sustainable if it is not safe for humans and that nothing is more valuable than human life. Road safety can be described as not only the measures taken to reduce the risk of road traffic injuries and deaths, but also the feeling of being safe within the road system and the assurance that the user will not be severely injured or killed in that system. Safety is now acknowledged in global environmental policies as essential to achieve sustainable development and should be a prerequisite for mobility, especially in developing countries where the number of road deaths is still too high. As part of this Special Issue, we invite papers of all kinds relevant to the implementation of sustainable and safe transport. The scopes for the Special Issue can be seen via: www.mdpi.com/si/63429.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

# Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

## **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
