

Special Issue

Rural Sociology, Agriculture and Ecological Territorial Development

Message from the Guest Editors

For some time now, the sustainability paradigm has permeated many areas of life. Public policies implemented in rural areas, and particularly those that affect the performance of agricultural and livestock activities, are evaluated based on sustainability criteria. In these circumstances, a key challenge for rural territories and their populations is the sustainable management of the material and human resources they have. Articles focused on the following topics are welcome for this Special Issue:

- Rural population development and ecological production relations;
- Depopulation processes of rural territories and their consequences for the sustainability of those territories;
- Food sovereignty, Food heritage; Short marketing chains in the agri-food sector;
- Ecological and organic productions, Ecological conscience;
- Analysis of sustainable agricultural public policies;
- Production, consumption, and sustainable food trends;
- Actors and rural agencies linked to ecological territorial development;
- Sustainable agronomic performance practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
