

# Special Issue

## Sustainable Rural Futures

### Message from the Guest Editor

The rural landscape, facing its most transformative period in our history, is key to any meaningful discussion on sustainability. In particular, the rural landscape is frequently positioned in terms of its role in the future of food production and food security, addressing issues of energy security and being part of the efforts confronting climate change. When it comes to thinking about the rural landscape, and particularly agriculture, a fundamental principle is the necessity to plan ahead. In our contemporary world, this fundamental principal is perhaps more significant now than ever. Our ability to adapt, to strategize, to overcome unexpected obstacles, and to build sustainable and resilient systems is a challenge and necessity we must fully embrace. The rural landscape, however, faces an array of challenges, such as an ageing farming population, limited land mobility, disillusionment among young farmers in terms of future livelihood sustainability, and the steady decline of the farm family. In this Special Issue, these key concerns and others, which will undoubtedly mould our rural futures, will be explored.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
