

Special Issue

Social Responsibility of the Manager in the Smart City Concept—Science 2 Business

Message from the Guest Editors

We are preparing a Special Issue with the aim of systematizing knowledge in the field of practical application and the importance of innovative solutions in the economic and social area. This should constitute a knowledge base regarding the basic concepts of Corporate Social Responsibility, formulating the important role of property management and managers in the context of CSR and smart cities. We will offer a scientific discussion covering following topics: the social and pro-ecological responsibility of the manager, and the principles of intelligent property management. Important aspects of urban development include the principles of smart cities to intelligent construction, the possibility of large-scale implementation of innovative zero-emission energy generation technologies, including the use of hydrogen technologies as generators of electricity and heat in residential buildings, and methods of energy storage for housing purposes. An important aspect of the discussion will be the analysis of the possibility of using BIM in construction and real-estate management.

Guest Editors

Dr. Renata Włodarczyk

Dr. Michał Dziadkiewicz

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
