Security on Web-Based Applications: Technologies, Methodologies, Analysis Methods and Recent Advances in Cybersecurity

Message from the Guest Editors

The continuous increase in the frequency and danger of attacks against the security of the information systems and the architectures that support them make it necessary to update and improve the methodologies related to the implementation and analysis of security and defense procedures, to provide greater security to online systems and applications of any type of organization. To achieve this goal, it is necessary to start implementing security in web applications and web services from the beginning of its construction, using a “secure” software development life cycle (SSDLC). This Special Issue will provide a forum to present research papers showing advances in the defense techniques of web applications and web service architectures and technologies. This Special Issue invites emerging topics related to the areas of implementation research and security test to fit in the scope of the journal and select high-quality research papers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
