

Special Issue

Sustainable Economic Policy, Taxation and Traditional versus Climate Goals

Message from the Guest Editors

This Special Issue is open to publications from the field of economic policy, economics, taxes, business economics, and law. It is open to papers which seek to explore the link between traditional economic and climate goals and the issues of carbon neutrality goals, reducing the use of fossil fuels, and reducing greenhouse gases from an economic point of view. Publications that examine the impact of individual economic policies in this area, and their specific implications, as well as the impact of the institutional and regulatory environment in this area are particularly welcome. Moreover, the application of new sophisticated methods and ideas and the creation of new scenarios and their comparison within the world economy, for example, in the European Union, in the USA or in the BRICS countries, are also welcome.

Guest Editors

Prof. Dr. Igor Kotlán

Dr. Zuzana Machová

Prof. Dr. Christiana Kliková

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
