

Special Issue

Slope Stability Analysis and Landslide Disaster Prevention

Message from the Guest Editors

Geologic disasters cause enormous losses of human lives and properties and serious ecological environment imbalances. Geologic disaster prevention and mitigation are essential, especially considering the effects of global climate change. Given these developments, this Special Issue invites original submissions, including recent advances in any aspect of slope stability and geologic disasters prevention from theoretical, numerical, or experimental perspectives. Topics may include but are not limited to:

- Landslides;
- Debris flows;
- Mountain hazards;
- Slope stability evaluation;
- Engineering geology and geological engineering;
- Geomechanics numerical simulation;
- Strong seismic motion and geological hazard;
- Disaster prevention strategy and management;
- Geological disaster monitoring, warning, and risk assessment;
- Hydropower engineering geological disaster prevention;
- Climate change and disaster prevention technology;
- Integrated disaster risk governance—assessment and management;
- Ecological geotechnical engineering;
- Soil freezing and thawing;
- Water loss and soil erosion.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
