

## Special Issue

# Moving towards Smart Low Carbon Mobility

### Message from the Guest Editor

Smart mobility encompasses a wide range of recent or likely changes in the fields of passenger transportation and daily people's mobility behavior linked to the increasing penetration of digital technologies, and especially the smartphone. Varied typologies of smart mobility have been proposed. They include, on the one hand, technological innovations such as autonomous vehicles, shared mobility services (bike and e-scooter sharing systems, ride-sourcing services, carsharing clubs, etc.), personalized travel planners, and mobility-as-a-service (MaaS) systems, which are mainly implemented by new private actors experimenting new business models. On the other hand, smart mobility also refers to people's increasing ability to get real-time information on transport systems and mobility options, manage their own travel behavior, and produce useful information for other travelers, mobility service providers, and urban planners. Finally, smart mobility also constitutes a new framework for national and local transport authorities, which raises important policy and governance issues.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
