

## Special Issue

# Smart Technology for Smart Cities and Neighborhood Changes

### Message from the Guest Editors

Many cities and communities have made efforts to capitalize on the recent innovative technological instrumentation for the enhancement of urban development and prosperity. Around the world, smart city landscapes are shaped by the urban development stages (growing or shrinking), local characteristics, and priorities. This Special Issue reinforces discussions about the integration of state-of-the-art geoinformation technologies and data as emerging resources to study and understand neighborhood dynamics for building healthy and inclusive communities. This Special Issue welcomes contributions worldwide that engage the leading-edge 'smart' technology and data to drive positive and desirable city and neighborhood changes on housing and neighborhood development, public services, transportation, and public participation to foster and preserve neighborhood vitality, such as, but not limited to:

- Information and communications technology (ICT) applications;
- Big data representation and visualization;
- Big data and information models and the adoption of open standards.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
