

Special Issue

Smart Solutions for Sustainable Transport Infrastructure

Message from the Guest Editors

This Special Issue is dedicated to papers focusing on enabling the sustainable development of transport infrastructure, by embracing smart technologies and frameworks for safer and more resilient mobility on future roads, railways, airports, and ports. Moreover, 'smart' here is intended not only to mean 'intelligent', but also to refer to the elegant solutions achievable through the use of emerging technologies and techniques that are new, or still at an early stage, in the transport infrastructure sector. The scientific papers might be covering both applied and fundamental research for urban and inter-urban surface transport and they can focus on any of the sustainability pillars. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
