Special Issue

Social Media, Crisis Communication, and Publics

Message from the Guest Editor

Crises are inevitable events that happen suddenly and harm businesses, non-profit organizations, public organizations, industries, economies, as well as public figures. Social media can impose barriers, as they are platforms where a crisis begins and escalates but can create opportunities for affected entities. Specifically. social media can help organizations and public personas monitor audience reactions; effectively communicate their crisis response; and thus, manage their image and reputation. However, researchers and scholars need to continue addressing questions such as: How are various crisis communication theories applied in different types of social media? What factors drive the effectiveness of social media crisis communication? How does social media crisis communication impact the offline world and the public's perceptions and emotions? What are the characteristics of social media users during times of crises? How do businesses, public organizations, and personas utilize social media to respond to different types of crises? Hence, this Special Issue aims to further research on social media crisis communication.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
