

## Special Issue

# Social Network Analysis and Social Networks in Education for Sustainable Development

### Message from the Guest Editor

Since social innovations such as ESD are implemented and realized through social relations, applications of quantitative and qualitative techniques of Social Network Analysis (SNA) or network and governance approaches as such to study the increasing relevance of ESD seem apparent. Despite considerable research on the involvement of ESD, however, its implementation through relations, as well as the interactions between different actors in these processes, have been researched scarcely with social network approaches. This Special Issue addresses the research gap and welcomes articles that are related to aspects of social networks and collaboration with a focus on education and sustainability. It encourages contributions employing different approaches and quantitative and/or qualitative network methods and drawing on different data.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
