

## Special Issue

# Socio-Economic Functions Across Sustainable Farming Systems

### Message from the Guest Editor

This Special Issue aims to accommodate research on socio-economic functions across sustainable farmland systems, with a focus on, but not restricted to, practices, policies, and planning for environmental conservation in agriculture, climate-smart agriculture, conventional and biotechnological agriculture which not only mitigate and/or adapt to the challenges of climate change, natural disasters, food insecurity, and conflict but also boost nature-positive production, stabilizes production, and improve the welfare of the producers; processing and marketing of farm produce which ensure the livelihood of the producers, processors, and consumers, and access to safe and nutritious food; integration of nonfarming with farming activities; and building of a society resilient to all kinds of crises and hazards/conflicts.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
