# Socio-Economic Functions Across Sustainable Farming Systems

### Message from the Guest Editor

This Special Issue aims to accommodate research on socio-economic functions across sustainable farmland systems, with a focus on, but not restricted to, practices, policies, and planning for environmental conservation in agriculture, climate-smart agriculture, conventional and biotechonological agriculture which not only mitigate and/or adapt to the challenges of climate change, natural disasters, food insecurity, and conflict but also boost nature-positive production, stabilizes production, and improve the welfare of the producers; processing and marketing of farm produce which ensure the livelihood of the producers, processors, and consumers, and access to safe and nutritious food; integration of nonfarming with farming activities; and building of a society resilient to all kinds of crises and hazards/conflicts.
