

## Special Issue

# Soil and Water Conservation: Discussing Erosion, Climate and Land Use Changes, and Ecosystem Services

### Message from the Guest Editors

Although soil and water conservation have been investigated by research groups across disciplines and around the planet, new challenges and pressures to soil and water resources arise constantly: climate change, urbanization, agricultural extension, ever-growing food demand, among others. There have been initiatives in a few countries where the amelioration of anthropogenic footprint has been sought by the offering of monetary incentives associated with maintaining ecosystem services (e.g., the adoption of soil conservation practices). We want to contribute to disseminating new knowledge in the form of research manuscripts describing state-of-the-art instruments and methods, new theories, or applied research. We encourage the submission of manuscripts addressing current challenges in soil and water conservation, the effects of climate and land use changes, erosion processes, ecosystem services, or any closely related topics.

### Guest Editors

Prof. Dr. Junior Cesar Avanzi

Department of Soil Science, Federal University of Lavras, Lavras  
37200-900, Brazil

Prof. Dr. Salvador Francisco Acuña-Guzman

Department of Agricultural and Biosystems Engineering, University of  
Puerto Rico, Mayagüez 00680, Puerto Rico

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
