Special Issue

Solid Waste: Environmental Resilience and Remediation

Message from the Guest Editors

We welcome your manuscript submissions on the theme of Solid Waste Management and Pollution Remediation. Municipal solid waste (MSW) generation is escalating with the occurrence of megacities and population growth. Mostly MSW ends up in open dumps and landfills, producing continuous environmental pollution through various emissions to air, water and soil. The economic cost involved and technical difficulties lead to discharge leachate without treatment is one of the most difficult tasks to manage. Among various solutions proposed and practiced in MSW management, composting and energy production have received the focus. Due to the open dumping of waste, various organic and inorganic pollutants including microplastics are prominently seen in compost. Therefore, this Special Issue of Sustainability invites manuscripts that address solid waste disposal and management, pollution monitoring and treatment, waste to energy and circular economy, reflecting new concept of sustainability in waste management, and advance knowledge on new research directions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
