

## Special Issue

# Advances in Statistical Methods for Environmental Applications

### Message from the Guest Editors

The purpose of this Special Issue of *Sustainability* is to collect works that present interesting empirical applications in environmental topics using advanced statistical methods. Fields of application can include air, water, energy, urban areas, green spaces, waste, biodiversity and climate change issues. They can also cover energy-saving behaviors from individuals and households and investment decisions to prevent and control industrial pollution by firms. The list of statistical methods includes, but is not limited to, machine learning techniques, decision trees, quantile regression, copula function.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
