

## Special Issue

# Supply Chain Management for Sustainable Development

### Message from the Guest Editor

The image of a modern supply chain has become inseparably associated with its care for ecological aspects and sustainable development. It can be assumed that the pursuit of sustainable supply chain management results from the needs of the modern world, and efficiency and care for natural resources contribute not only to improving its image but also to waste reduction, innovation, generating profits, and building a competitive advantage.

Considering the above, this Special Issue looks for outstanding research and development results, case studies, and review papers in topics that include but are not limited to the following:

- Sustainability in supply chain management;
- Drivers and barriers SSCM;
- UN SDGs;
- Risk management in the SSCM;
- Models of SSCM;
- Management systems and improving SSCM;
- ISO 14001, ISO 9001, and ISO 22000;
- Green supply chain management;
- Environmental management;
- Social responsibility.

Thank you for your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
