# Nature Based Solutions to Support Climate Change Adaptation and Sustainable Development

### Message from the Guest Editors

There are growing concerns due to the increase of both frequency and magnitude of natural disasters, and particularly of water-related risks (floods and droughts). Such extremes have severe effects on communities, on the economy, and on the environment, which may be even worsened by additional pressures such as climate change. Policy- and decision-makers are thus increasingly aware of the need for more systemic perspectives oriented at supporting climate change adaptation, water-related risk reduction, sustainable development, and conservation and restoration of ecosystems. In this direction, EU policies are supporting the 'working with nature' method, and nature-based solutions (NBS) are becoming central in responding to multiple challenges. The European Commission defines NBS to societal challenges as "solutions that are inspired and supported by nature, which are cost-effective, simultaneously provide environmental, social and economic benefits and help build resilience.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
