

Special Issue

Sustainable Crop Production Systems

Message from the Guest Editors

Existing crop production systems need to be adapted to a changing climate, technological landscape and are critical to the sustainable food security of quality produce. Crop production management typically includes use of monitoring tools, and effective pest, nutrient, and irrigation management, as well as post-harvest management. From this perspective, this Special Issue will encourage publications of scientific, technological and engineering research aspects of crop genetic modeling, high throughput phenomics, precision agriculture, plant physiology, and agronomic practices to realize sustainable crop production systems. Manuscripts that address advancements in the above areas, with field validation emphasis, as well as critical review of technologies/tools that increase scientific knowledge will be considered in this issue. Manuscripts will be subjected to a rigorous peer-review procedure with the aim of rapid and wide information dissemination.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
