

Special Issue

Exploring Sustainable Entrepreneurship and Innovation Management

Message from the Guest Editors

This Special Issue (SI) aims to develop an agenda of research, practical, and policy contributions for the next decade on sustainable entrepreneurship and innovation management, as well as to debate the lines of action that academics and professionals should consider for the coming years. Sustainable entrepreneurship (SE) is today widely recognized as the answer to the environmental, economic, and social challenges that society has to face (Filser et al., 2019, p. 3). Sustainable entrepreneurship is an innovative process that must generate both economic and non-economic benefits and guarantee social, economic, and environmental benefits for future generations. SE is based on the socio-economic concept of sustainable development and recognizes the social and ecological limitations that require that social, natural, and economic resources be used responsibly and distributed in such a way as to guarantee access to future generations. In other words, the SE calls into question the traditional dichotomous view of economic benefit at the expense of environmental and social impacts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
