

## Special Issue

# Sustainability in Geotechnical Engineering

### Message from the Guest Editor

Geotechnical engineering is one of the disciplines to be first called upon in the construction of the built environment. It is also one of the most resource-intensive disciplines within civil engineering. This Special Issue is focused on sustainable systems/design, sustainable materials, sustainable construction, and maintenance technologies. There have been many studies considering sustainability in energy geotechnics, material energy, material reuse and recycling, material and waste reengineering, foundation rehabilitation and reuse, the use of underground space, and sustainable ground improvement applications. The scope of this Special Issue is the quantitative evaluation of the social, economical and/or environmental impacts of sustainability practices in geotechnical engineering.

#### Keywords

- quantitative assessment
- geotechnical sustainability
- sustainability framework for geotechnical engineering
- assessment tools
- material reuse
- material recycle
- waste reengineering

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
