

Special Issue

The Competitiveness and Sustainability of Global Agriculture

Message from the Guest Editor

Competitiveness is the backbone of modern agriculture. Although the concept lacks a universally accepted definition and measurement method, there has been a growing number of research on farm, regional, national, and global competitiveness of agricultural activities recently. Company leaders and decision-makers constantly explore different ways to increase the competitiveness of their firms, industries, and nations. This Special Issue aims to provide unique insights to the competitiveness of global agriculture and also their sustainability challenges. Original papers analyzing the competitiveness of agricultural farms, the food industry, value chains or the farm sector are welcome. Authors are encouraged to cover a wide range of geographical coverage from local to global issues. Papers focusing on the changing nature of agricultural competitiveness in time are also welcome. The issue pays special attention to the determinants of agricultural competitiveness and the associated dilemmas among economic, environmental, and social challenges.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
