

Special Issue

Meeting Sustainable Development Goals by Reducing Food Loss

Message from the Guest Editor

The target set by the UN is to halve the per capita global food waste by 2030 at the retail and consumer levels and reduce food losses along the production and supply chains, including post-harvest losses. Food loss is affecting various aspects of the food supply chain and many aspects of society—producers, growers, retail, hospitality, consumers, and those who experience food poverty.

The aim and scope of this Special Issue is to provide a unique platform for a wide range of professionals, including scholars, researchers, academicians, business, and industry to discuss and present high-quality research linking reduction of food waste to any of the 17 Sustainable Development Goals (SDG) and the associated 169 targets.

- Sustainable consumption and production
- Food security
- Reducing food loss and sustainably use of oceans produce
- Reducing food loss and sustainable use of terrestrial ecosystems
- Resilient and sustainable cities
- Food loss and climate action
- SDG
- regulation and policy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
