

Special Issue

Sustainable Solutions for Hydraulic Engineering

Message from the Guest Editors

The improvement of fundamental knowledge and technologies on design, construction, operation and disaster management is key for the sustainable development of hydraulic engineering. This Special Issue is devoted to the research of sustainable solutions for hydraulic engineering during the whole lifecycle. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Sustainable construction materials for hydraulic engineering;
- Advances in design method of hydraulic engineering;
- Environmentally friendly and lean construction technologies for hydraulic engineering;
- Sustainable and intelligent technologies in operation and maintenance of hydraulic engineering;
- Risk analysis and disaster management for hydraulic structures under extreme conditions;
- Security assurance and protection technologies for hydraulic structures under extreme conditions;
- Other recent progress in fundamental knowledge of hydraulic engineering

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
