

# Special Issue

## Sustainability in Textiles

### Message from the Guest Editor

This Special Issue entitled Sustainability in Textiles aims to promote science- and research-based findings on the impact of textiles on nature and science-based predictions and assessments of global change and the direction we as humankind should move to sustain our planet. Research areas:

- Raw materials for the textile industry, including production and processing issues;
- Textile production and processing, including water consumption, chemical additives, dyeing, and finishing in all textile branches, including technical textiles, geotextiles, etc.;
- Washing and microfibers (pollution of water);
- Degradation;
- End-of-life, chemical and mechanical recycling, upcycling, closing the loop, and circular economy;
- Fast fashion and overproduction/current business models and practices.

---

### Guest Editor

Dr. Izabela Luiza Ciesielska-Wróbel

Department of Textiles, Fashion Merchandising and Design, College of Business, University of Rhode Island, 55 Lower College Road, Kingston, RI 02881, USA

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
