Special Issue

Sustainable Land Use and the Bioeconomy

Message from the Guest Editor

We would like to invite you to submit a manuscript to our Special Issue of Sustainability, which will be focused on Sustainable Land Use and the Bioeconomy. The objective of this Special Issue is to give an evidencebased contribution to scientific knowledge on topics related to bioenergy, biochemicals, biomass, biochar, land use change, systems models, carbon dynamics, food security, environmental services, rural development, policy strategies, and the sustainable use of natural resources, including soil, water and fertilizers. Regional case studies and international assessments are also welcome. The current efforts on climate change mitigation have not been sufficient to avoid a dangerous increase in the global mean surface temperature in the coming decades. At the same time, the global population and the demand for food, forest, and bioeneray products continue to increase. The challenge is finding ways to promote sustainable land use, whilst also achieving food and energy security, water and biodiversity conservation, and carbon mitigation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
