

## Special Issue

# Industry 4.0 in the Context of Fostering Sustainable Manufacturing and Circular Economy

### Message from the Guest Editors

Despite the literature on broader topics of Industry 4.0, sustainable manufacturing and circular economy are gaining momentum, particularly several studies on Industry 4.0 readiness/maturity models and the close connection between Industry 4.0 and circular economy, their connection and association from the perspective of priorities and relationships of key factors across all three areas are in the infancy stage. Furthermore, implementation methodologies and frameworks for supporting Industry 4.0 adoption taking into consideration of sustainable manufacturing and circular economy are lacking in the literature.

This SI focuses on empirical approaches (quantitative, qualitative, or mixed-methods), but papers presenting frameworks, new theory, secondary/archival data also are welcome when integrated with an empirical approach. The research topics should be related to the intersection of three closely related areas: Industry 4.0, sustainable manufacturing and circular economy.

- Industry 4.0 readiness/maturity
- Industry 4.0 adoption
- enablers and challenges, frameworks
- sustainable manufacturing
- circular economy

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
