The Effects of COVID-19 Pandemic on Engineering Design and the Sustainability of the New Developed Products

Message from the Guest Editors

The fight against the COVID pandemic is a call to all fields of scientific research, not only to medical and public security experts. Engineers can contribute to the development or optimization of solutions that would allow us to detect, cure, and contain the spread of this subtle disease, such as protective masks, assisted breathing devices, diagnostic systems, or medical organizations and procedures. It is important to take advantage of this large effort and evaluate the potential of these new technologies from the perspective of development speed, time to market, and sustainability. Original manuscripts exploring practical case studies of innovation, development, and / or optimization of medical or everyday use products, highlighting the aspects related to design choices are invited. Case studies focusing on the description of the new development paradigm are also welcome, considering as significant aspects the proposal of rapid, innovative, and sustainable solutions also at the level of engineering education for sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
