Special Issue

Sustainable Urban Stormwater Management

Message from the Guest Editors

Urban growth and land use change cause land degradation and increasing susceptibility to water-related natural hazards. In the last several decades, large efforts have been made to improve urban drainage systems to mitigate the impacts of land degradation and to make cities and urban settlements sustainable in accordance with the UN 2030 Agenda for Sustainable Development. The limitations linked to the traditional urban drainage approach were pointed out, and new approaches are being developed introducing more natural methods for retaining and/or disposing of stormwater.

This Special Issue will provide an attempt to share knowledge among experts and researchers working on the main aspects related to urban drainage management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
