

Special Issue

Sustainable Use of Wildlife

Message from the Guest Editor

In this Special Issue of Sustainability, “Sustainable Use of Wildlife”, we intend to deal with demographic and evolutionary impacts of hunting pressure on wildlife. We aim to stimulate the submission of papers on three levels: conceptual, technological/methodological, and societal. At the conceptual level, we would like to focus on how sustainable use can affect not only demographic but also evolutionary processes concerning used species, including their behavioural ecology and environmental health. At technological and/or methodological level we would like to focus on innovations that can promote sustainable use of wild species as well as the life quality of the human people who explore them. At the societal level, we would like to focus on the socioeconomic as well as cultural dimensions concerning wildlife sustainable use and the governance components (e.g., public policy, environmental certification, and education) that can improve wildlife management and assure their sustainable use. Thank you for your attention. All the best, Luciano

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
