

Special Issue

From COP 26 to COP 27: Contributions of Systems Approaches to Address the Challenges Ahead

Message from the Guest Editors

The recent Conference of Parties 26 (COP26) claimed to reinforce collective actions towards the Paris Agreement to tackle the climate crisis while declaring the state of global emergency. The goal is to achieve net-zero global emissions by 2050 to keep the increase in global average temperature below 1.5 °C in comparison to pre-industrial levels. To achieve this goal, it is urgently required to strengthen the collaborations between governments, businesses, and civil society.

With this foreground, it becomes clear that the development of effective strategies to face both the complexity of global decarbonization and the restoration of planetary well-being must account for applied holistic, inter-disciplinary and long-term thinking. To this end, this Special Issue focuses on exploring, analyzing, and proposing interdisciplinary systemic approaches to support multilateral collaboration strategies, and help shape commonly agreed policies towards global sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
