

Special Issue

Green Energy and Tourism Policy for Sustainable Economic Growth

Message from the Guest Editor

The field of Energy/Tourism Economics is constantly changing and its research structure, especially regarding green energy, is rapidly evolving. Although numerous studies have been published in this area, the comprehensive intellectual improvement process of the field is not well depicted due to lack of green-energy-related studies. Therefore, there is a need for research that reveals the intellectual structure of the field, which is valuable in terms of indicating the significance of energy/tourism economics, development trends, the extent to which issues need to be studied in the future, and guiding the improvement of the field. The results of this research may advance knowledge and understanding in this area, while also providing useful information for energy innovators/researchers to improve and expand upon their research plan/experience. This knowledge can also help to increase positive green energy/tourism projects, such as *sharing economy*, *open innovation*, *sustainability*, and *technology*. We welcome both original research and review paper contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
