

## Special Issue

# The Energy-Sustainability Nexus

### Message from the Guest Editor

Dear colleague, This special issue of Sustainability explores the complex interrelationships between society's need for energy and the ongoing quest for a sustainable world. This involves energy production, human and ecosystem health, pollution prevention, resource allocation and associated economic factors, patterns of consumption, policy development, and regulatory approaches. Papers that cross over among two or more of these aspects are especially sought. Papers can provide comprehensive reviews of the latest technological developments, or can address a variety of topics such as life cycle assessment of energy systems, schemes for the integration of human activities with the natural environment, processes or designs for resilient human-engineered systems, analyses of human behavior in relation to product or energy use, and best management practices.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
