# Towards the Sustainability of Al; Multi-Disciplinary Approaches to Investigate the Hidden Costs of Al

# Message from the Guest Editors

Prof. van Wynsberghe invites researchers of all relevant fields to start thinking about the sustainability of Al and aims at sparking discussion on the environmental, social and economic costs of designing, developing and using Al across society. The questions to be explored span across multiple disciplines and levels of analysis, for example: the normative grounding of the value of sustainability; the strength of the concept of sustainability; how to measure environmental costs of Al; understanding the intergenerational impacts of Al; and, informing public policy guidelines for the green, proportionate and sustainable development and use of Al. Contributions from the perspectives of: computer sciences, philosophy, (applied) AI ethics, social sciences, law and policy, and others are welcome and encouraged.
