

Special Issue

Sustainability Analytics over Responsible Organisations

Message from the Guest Editors

This Special Issue welcomes conceptual papers and empirical research, covering theories, method, tools and experiences on: ethical, social and environmental accounting; sustainability indicators for organisations; sustainability, non-financial and integrated reporting; analysis of corporate sustainability; data-intensive approaches to impact measurement, impact assessment or life-cycle assessment; sustainability-related operations research; policy-making in relation to sustainability analytics; organisational networks and ecosystems built upon sustainability analytics platforms. Other related topics are also welcome. We are interested in why organisations perform sustainability analytics, how they apply it and use the results, and what they actually analyse. The papers in this Special Issue will expand the knowledge base on sustainability analytics applied to responsible organisations and identify avenues for future research. Together we can contribute to shaping a more responsible economy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
