Sustainability and Digital Innovation in Places: A Spatially-Bounded Innovation System Perspective

Message from the Guest Editor

During the last few decades, increasing attention has been paid to innovation systems literature, evidencing the importance of spatially-bounded systems of innovation made up of actors, networks, and institutions. Sustainability-oriented innovation and digitization are new topics intersecting innovation systems strands. Theory and evidence, however, is scant. It turns out to be important that researchers come up with new evidence and knowledge that may contribute to providing a better understanding of these new phenomena and thus facilitate knowledge and insights for improving our understanding of sustainability-oriented innovation and digitization in those innovation systems and their firms. We invite you to join the discussion in this Special Issue to examine in depth the dynamics and interactions of RIS and clusters, networks, and institutions throughout sustainability and digitization topics. Case studies, theoretical developments, qualitative and quantitative research, as well as literature reviews, addressing innovation systems and their firms, are all welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
